

MovieStars

Online Inventory Animation

Turn your cars into MovieStars!

With MovieStars, your inventory is transformed from standard car pictures into entertaining and informative movies that brings your vehicles to life. Make your cars stand out from the boring static images that are seen on other dealership websites and give your website inventory the edge!

MovieStars integrates directly with your Dealer Solutions Online Inventory System, so when a new vehicle comes into stock a movie is automatically created. Each movie is unique and created with moving pictures that show the car at its best angles, with background music to set the scene and a voiceover that describes the car's features.

With no additional effort needed to create a dynamic inventory that stands out and encourages interaction from your customers, what are you waiting for?

Features:

- Images on your website will be replaced by a unique movie for each vehicle.
- Each movie features moving pictures of the vehicle, a voiceover describing the vehicle's features and background music.
- Movies are created automatically when you have a new vehicle in stock.
- No additional work required at the dealership.

Benefits:

- Images on your website will be transformed into unique movies which are created for each vehicle in stock with moving pictures of the vehicle, a voiceover describing the vehicle's features and background music.
- Integrated with Dealer Solutions Online Inventory System, our system will recognise when a new vehicle comes in stock and a movie will be created automatically.
- Movies are created using information and images we already have access to so there is no additional work required from the dealership.

Transform your boring standard car pictures to informative and entertaining movies that sell cars.

Unique individual movies showing the best angles and features of each car in your inventory are automatically generated to create a more engaging experience.
